THE TALE
OF THE
DIGITAL
DECEIVER

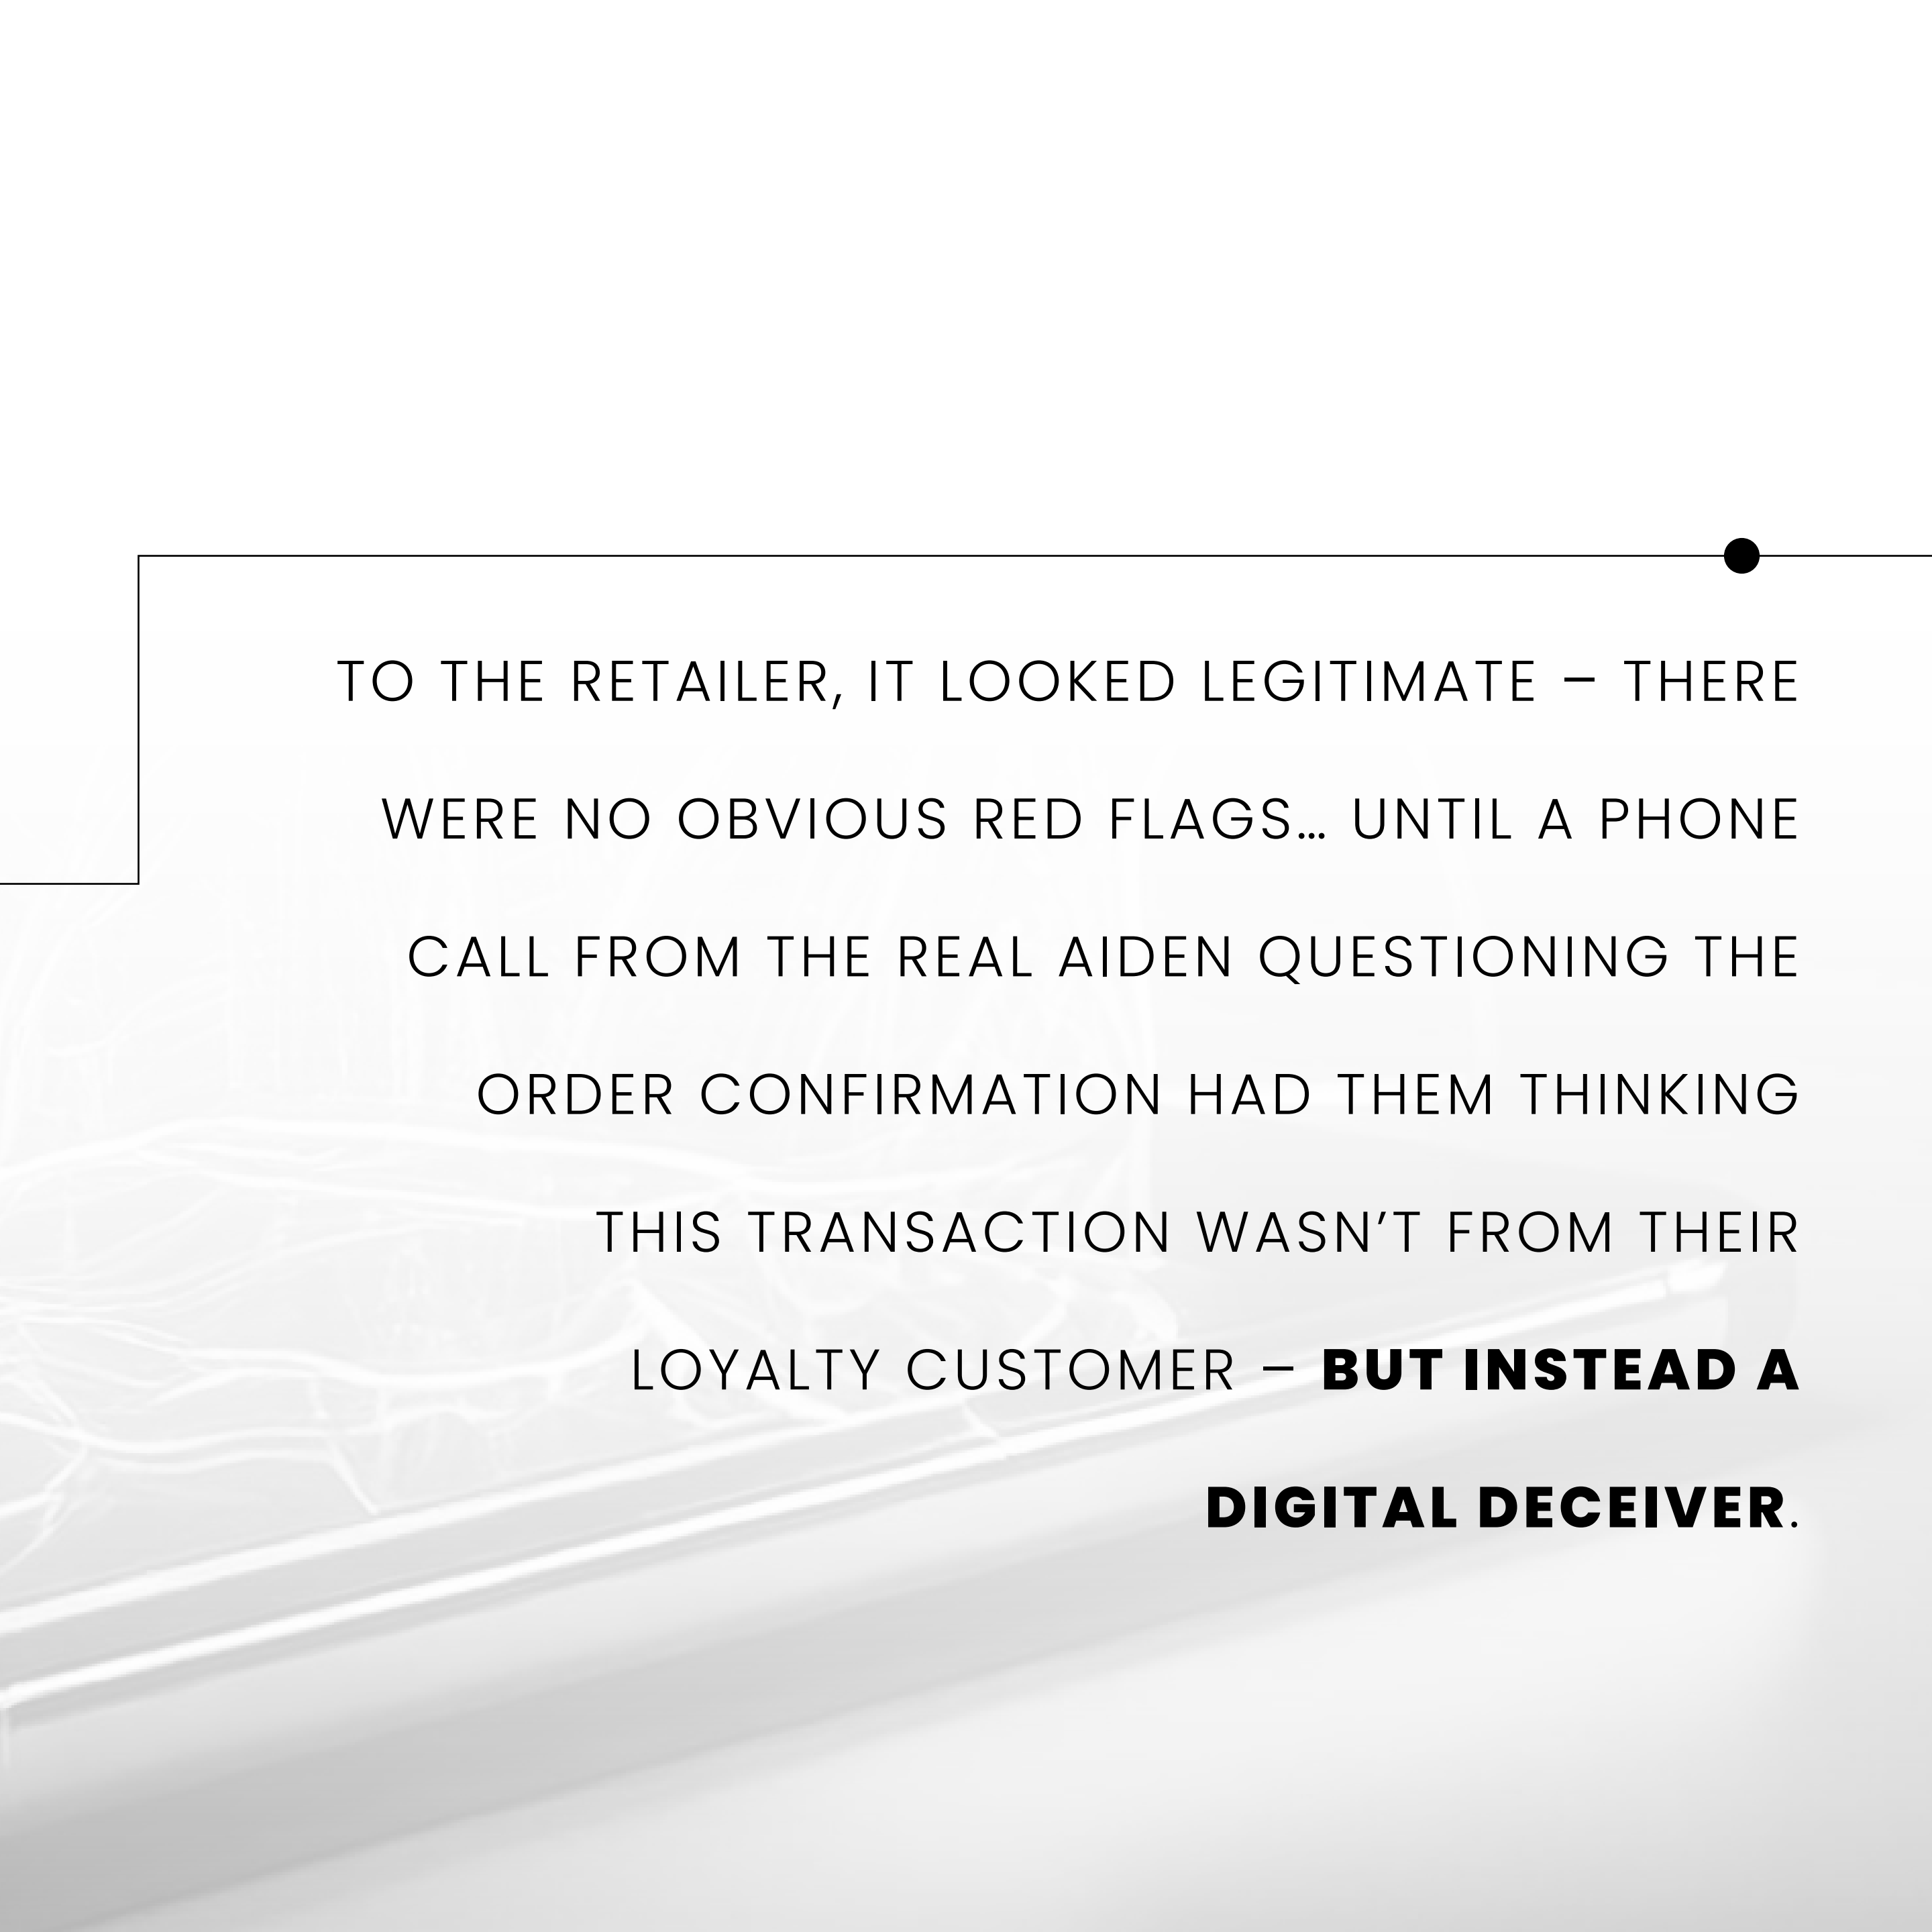

Spycloud

“AIDEN” LOGGED INTO HIS
FAVORITE RETAILER’S SITE AND
FINALLY BOUGHT THE CAMPFIRE
STOVE HE’D BEEN WANTING FOR
MONTHS. **OR DID HE?**

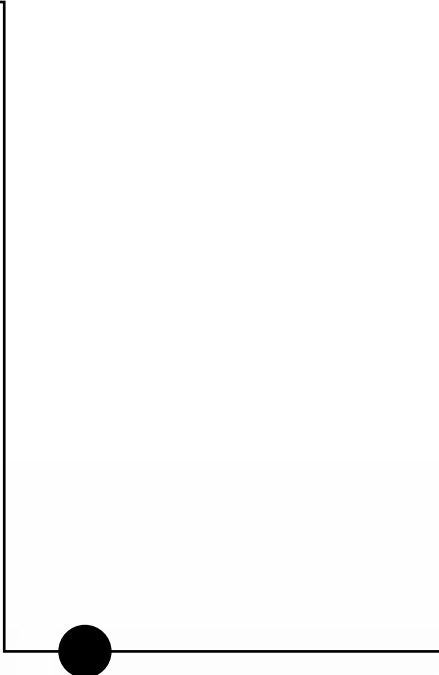

TO THE RETAILER, IT LOOKED LEGITIMATE – THERE
WERE NO OBVIOUS RED FLAGS... UNTIL A PHONE
CALL FROM THE REAL AIDEN QUESTIONING THE
ORDER CONFIRMATION HAD THEM THINKING
THIS TRANSACTION WASN'T FROM THEIR
LOYALTY CUSTOMER – **BUT INSTEAD A
DIGITAL DECEIVER.**

THE REAL AIDEN HAS LOTS OF
EASY-TO-REMEMBER CREDENTIALS,

INCLUDING AN **OLD USERNAME &
PASSWORD THAT HE USES EVERYWHERE.**

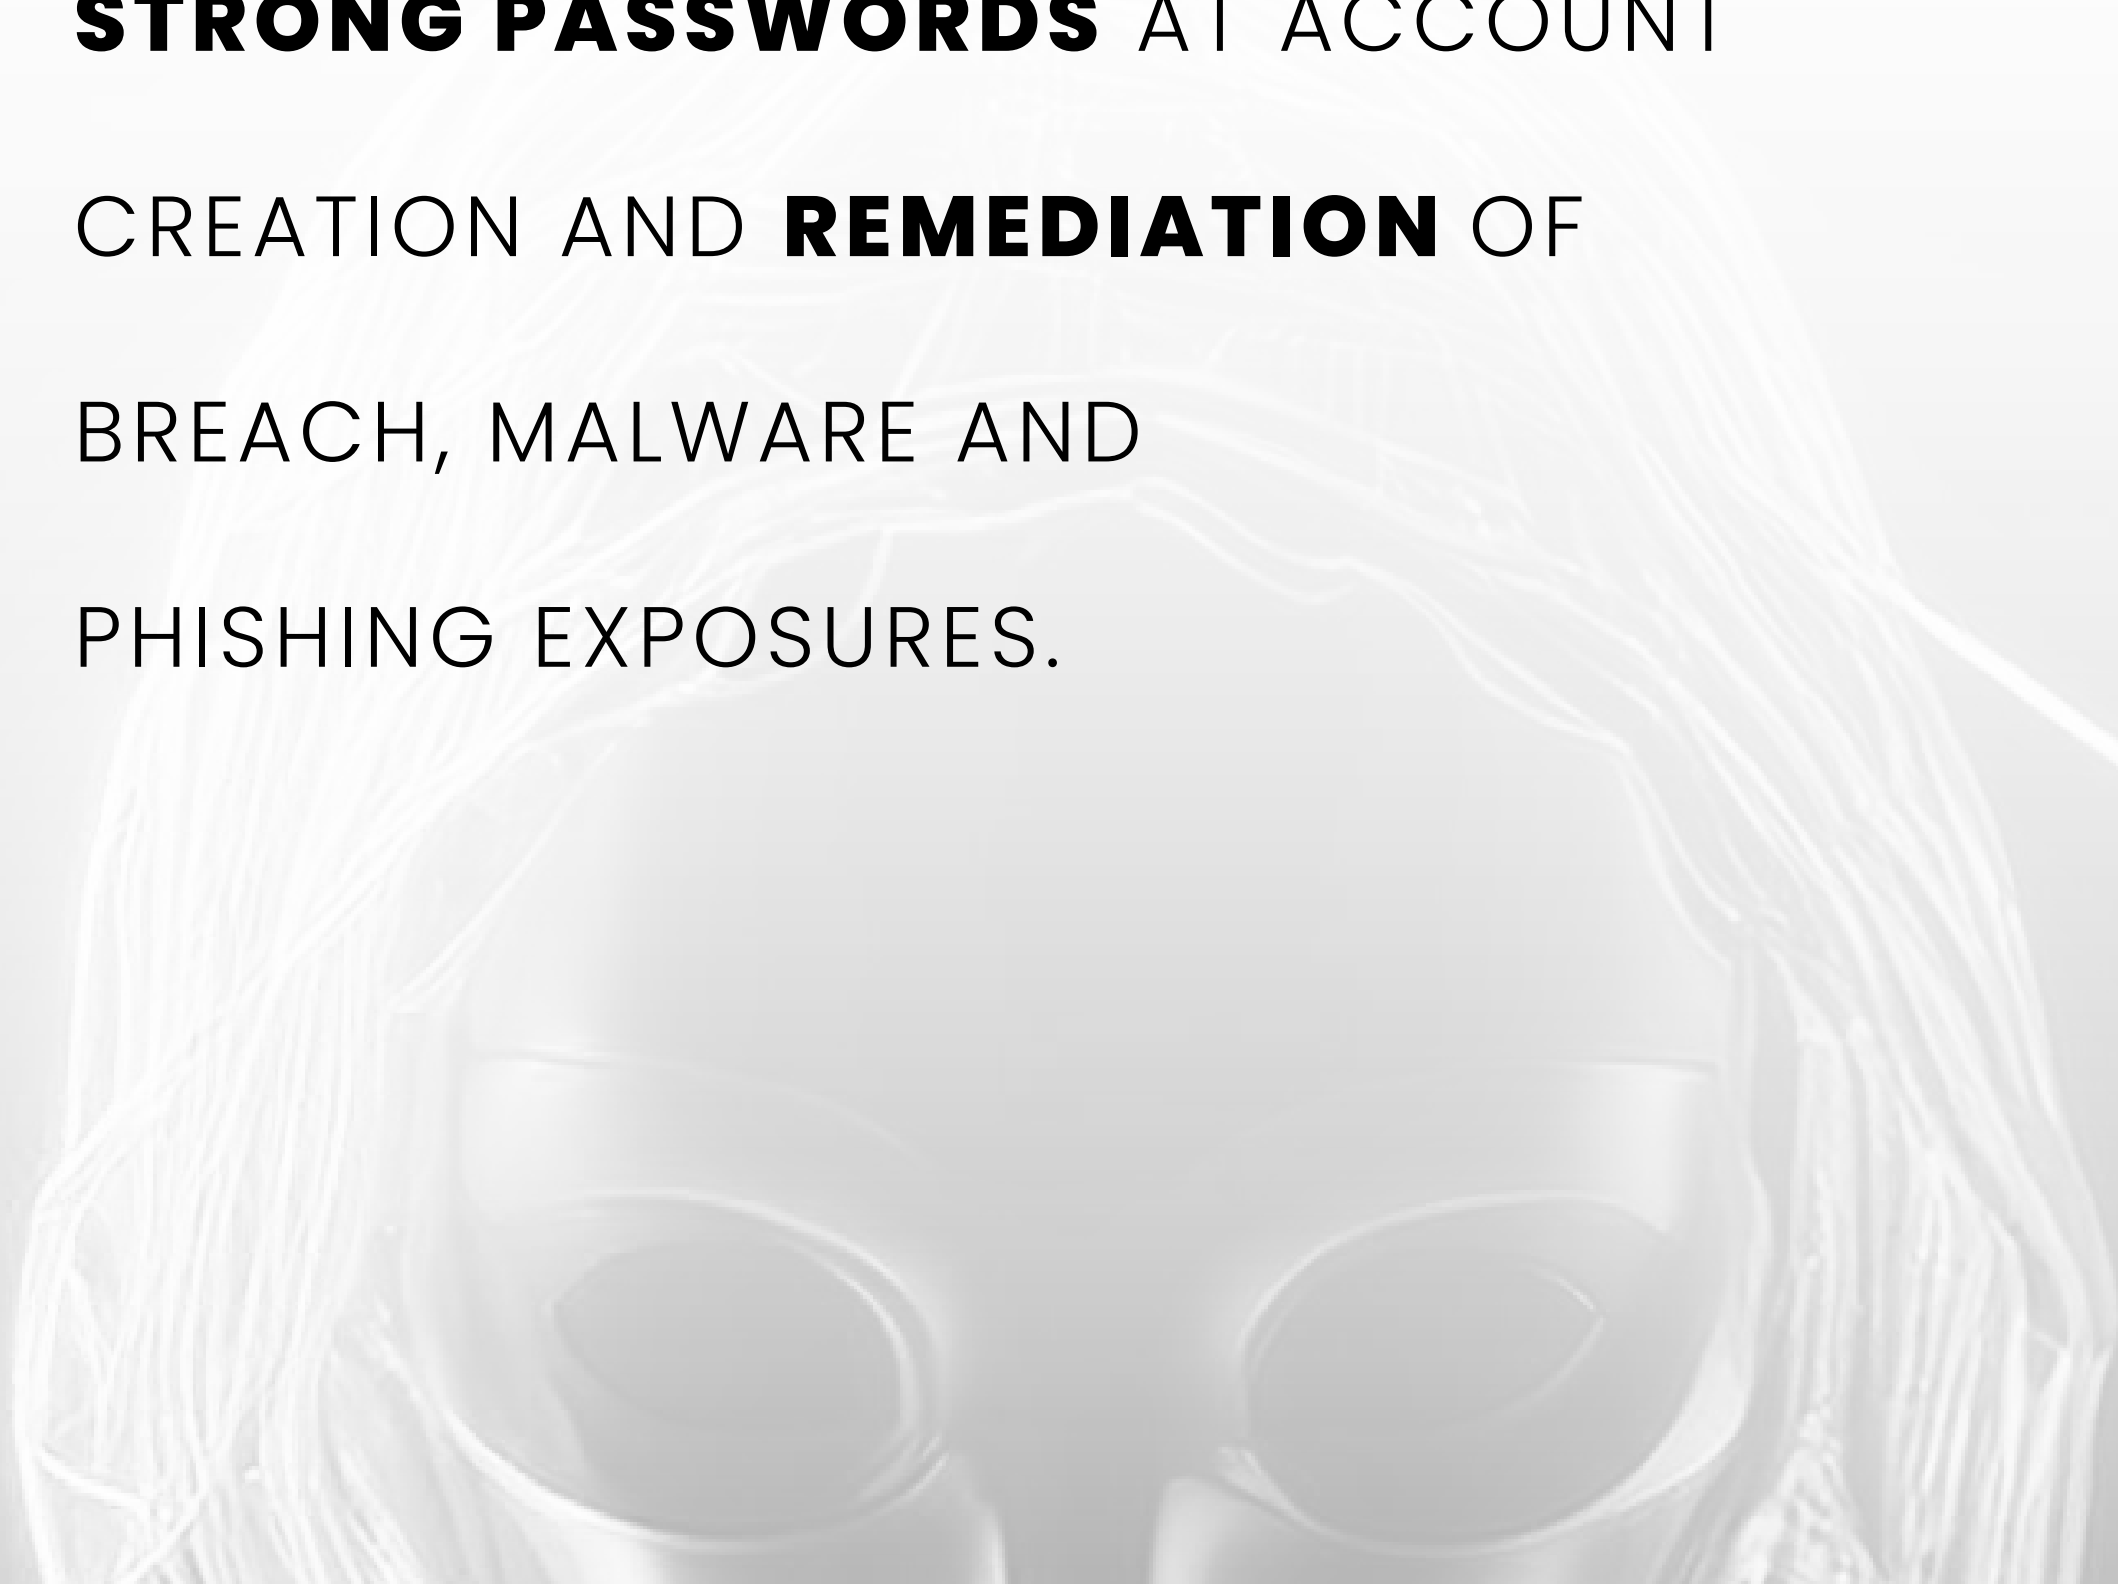

THEY'D BEEN EXPOSED IN A BREACH A YEAR
AGO, BUT HE'D MADE IT THIS FAR WITHOUT
ANYTHING HAPPENING, SO HE FIGURED HE
WAS SAFE.

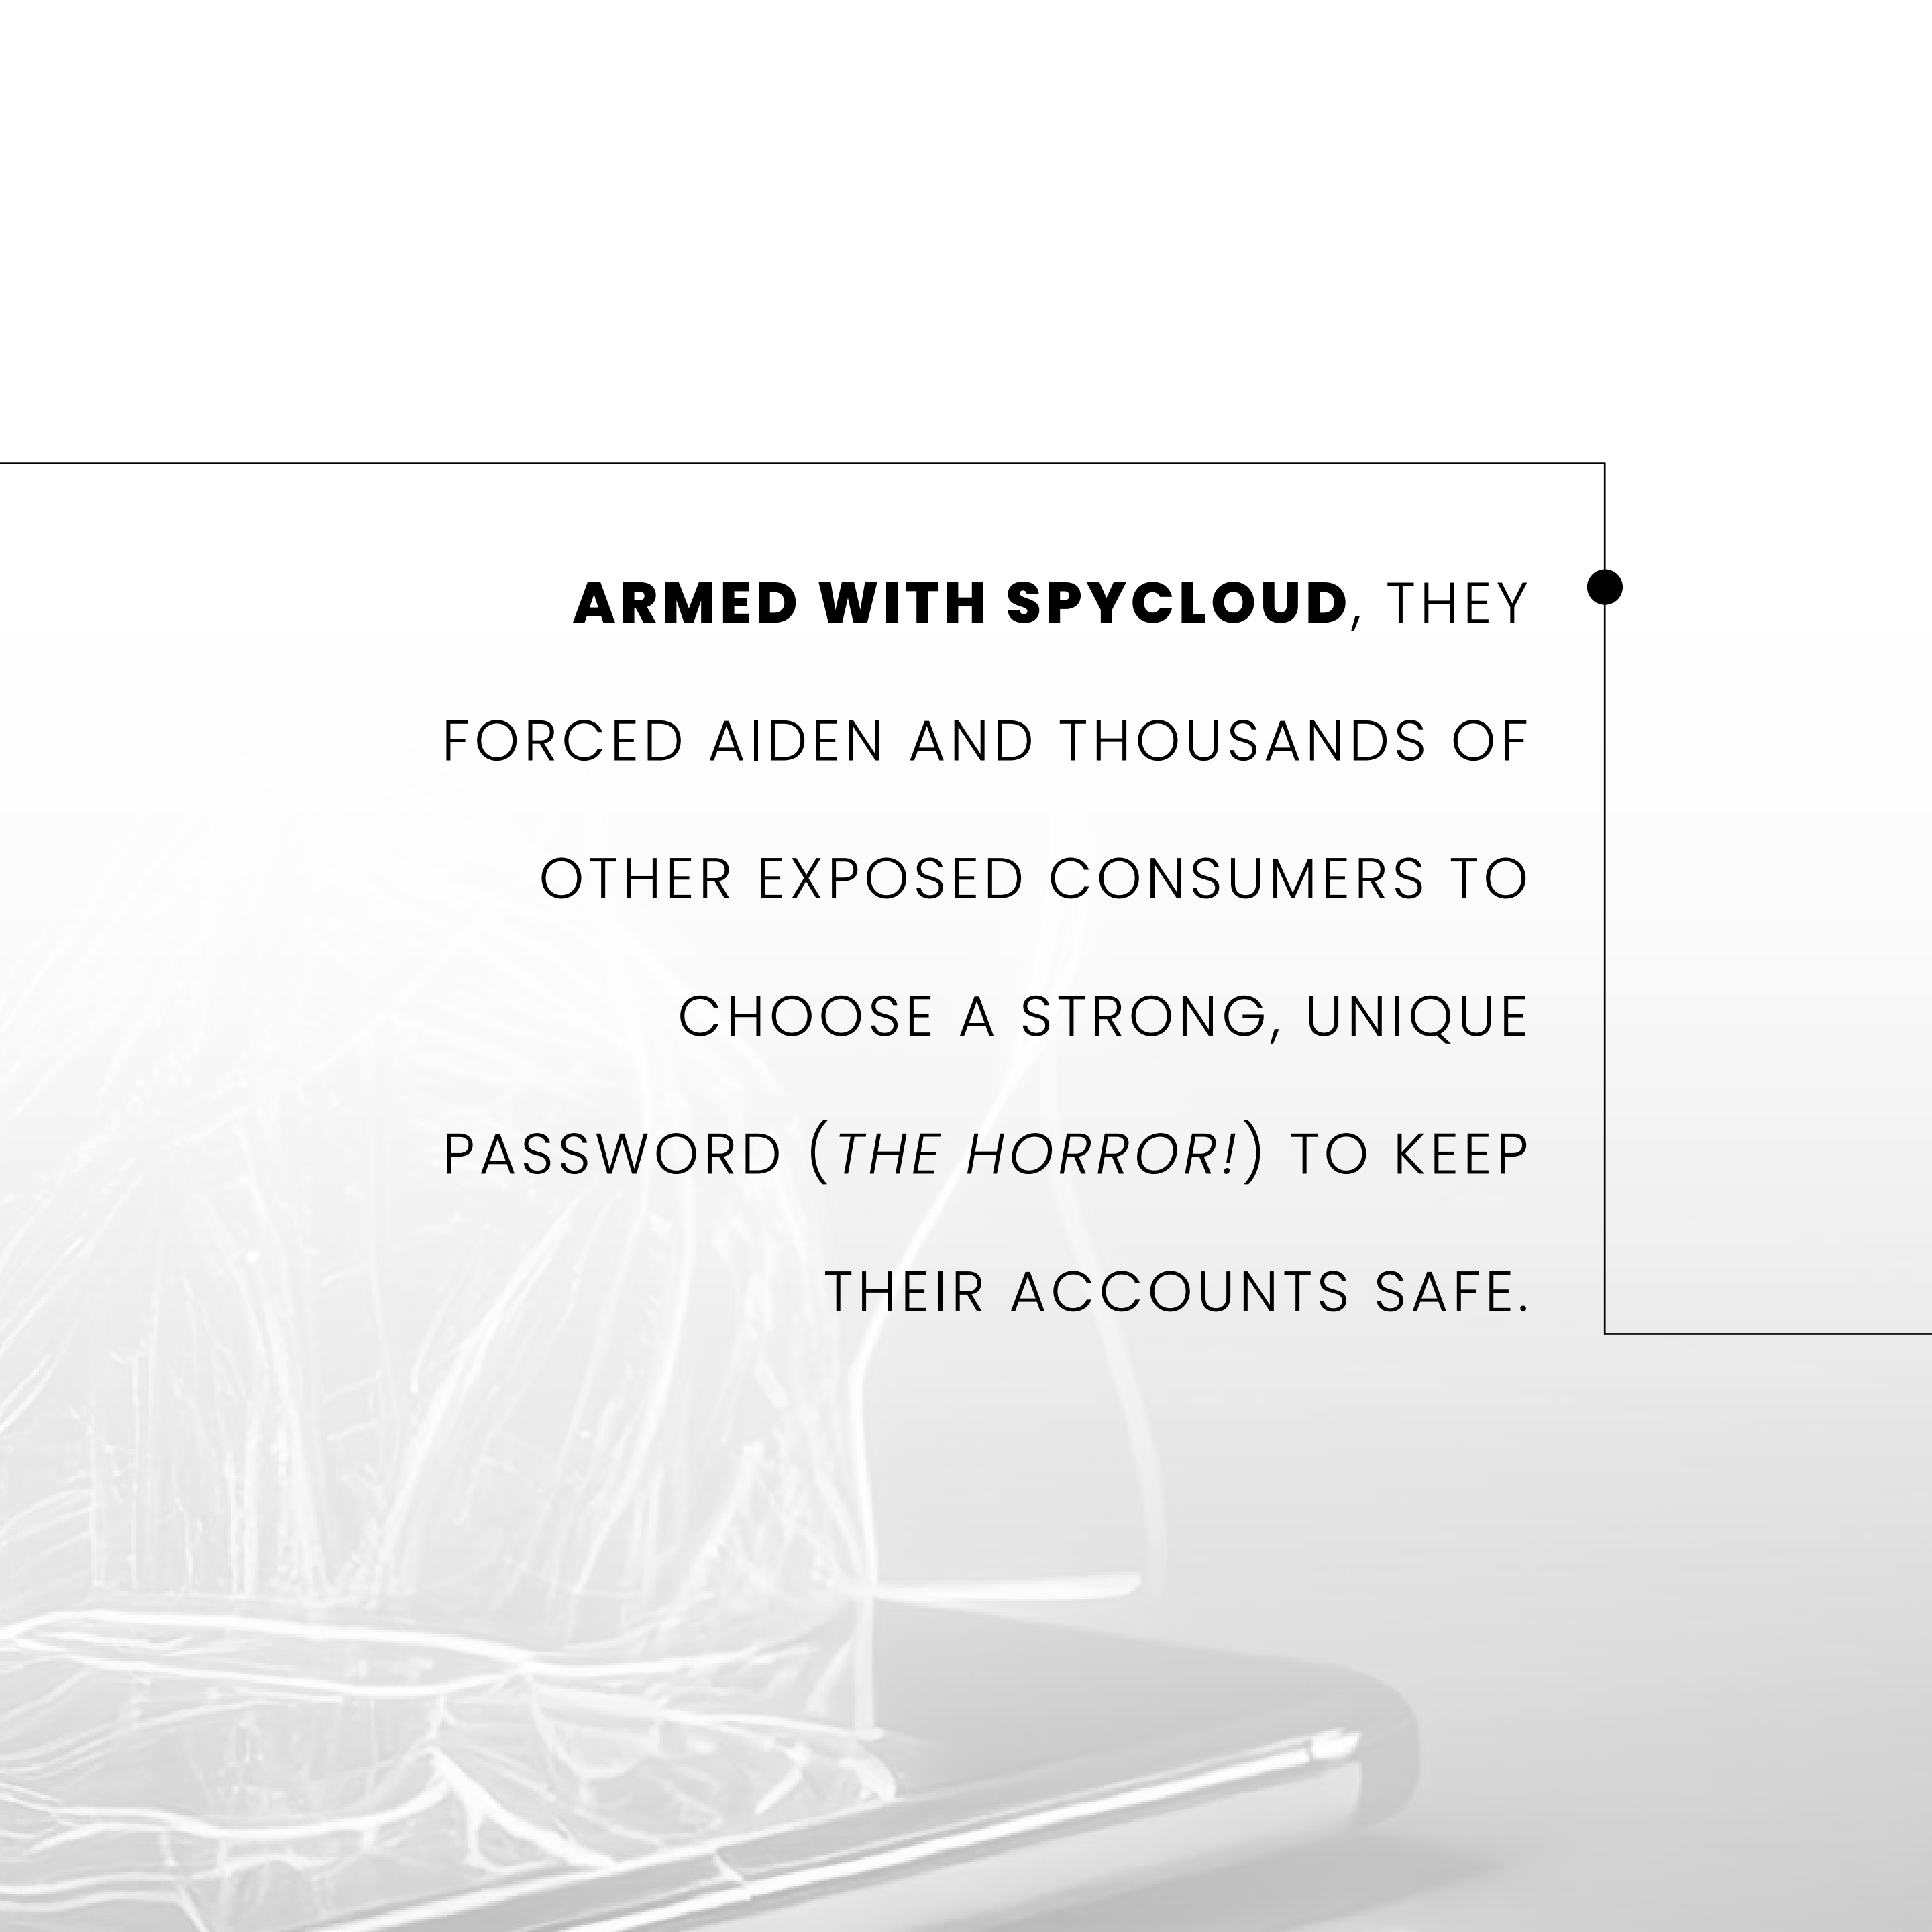

**ACCOUNT TAKEOVER FRAUD PLAGUED THE
RETAILER.** THEY NEEDED A CYBER PROTECTOR
TO STAND BETWEEN THEM AND THE DIGITAL
DECEIVERS USING STOLEN CREDENTIALS TO
HARM THEIR BUSINESS – AND CUSTOMERS
LIKE AIDEN.

THEIR SEARCH LED THEM TO **SPYCLOUD**
FOR **AUTOMATED ENFORCEMENT OF**
STRONG PASSWORDS AT ACCOUNT
CREATION AND **REMEDIATION** OF
BREACH, MALWARE AND
PHISHING EXPOSURES.

ARMED WITH SPYCLOUD, THEY
FORCED AIDEN AND THOUSANDS OF
OTHER EXPOSED CONSUMERS TO
CHOOSE A STRONG, UNIQUE
PASSWORD (*THE HORROR!*) TO KEEP
THEIR ACCOUNTS SAFE.

CHECK YOUR CONSUMERS'

DARKNET EXPOSURE, INCLUDING

STOLEN SESSION COOKIES,

BREACH SOURCES, PLAINTEXT

PASSWORDS, AND MORE.
